

Heading:

Sprint 1 Plan

Scrum Mate

Goal:

Setup the project and implement the first part of the project, which would be the UI and the backend

Spikes:

- Decision on the tech stack
- Agree on the design of the front end, create wireframes so we can start working on the UI
- Design UI on figma
- Create shared mysql database / firebase so we can start working on the backend

Stories:

(1.1) As an end user, I want to create an account

Tasks:

- Create back end (1 point)
- Add model for users (Royce) (2 points)

(1.2) As an end user, I want to create a new project. I will be the product owner of the project.

Tasks

- Create models for projects (2 points)
- Add relational mapping for a user to project in the database (1 point)

(1.3) As a product owner, I want to give access to the project to my team members.

Tasks:

- Add relational mapping for user-to user in the database (1 point)
