

## Sprint 4 Plan

Spikes:

Stories:

- (4.1) As a product owner, I want to add members to my project using their emails, rather than adding their names. (3 points)

Tasks:

- [Frontend] Add multiple fields for adding members.
- [Backend] Authenticate the member and add them to the current project
- (4.2) As a product owner, I want to use user stories to create sprints and add tasks (3 points)

Tasks:

- [Frontend] Add new fields for creating multiple sprints within a project
- [Backend] Route the inputs to the database
- [Backend] Create the controller functions for multiple sprints
- (4.3) As a user I would like to create sprints and add tasks to sprints (2 points)

Tasks:

- [Frontend] Setup the form to add sprints
- [Backend] Setup the model to add sprints to the backend.
- **Miscellaneous**

Tasks:

- Write documentation for the next team
- Add Comments according to the style guide (Frontend and Backend)
